Relevant Projects

SymNet

Python 3, Keras — *Jun 2019 - Present*

Created a high-level deep learning framework with a custom adaptive learning rate scheduler, novel activation functions, and built-in data pre-processing. The framework also picks reasonable default network architectures.

Personalized Chatbot

Python 3 — *May 2019*

Fine-tuned GPT-2 345M model on message data (730k messages) from Telegram to create a personalized chatbot.

Intelligent Tutoring System

Python 3 — *Sep 2018 - May 2019*

Implemented the back end of an Intelligent Tutoring System (ITS), using a Hidden Markov Model and a custom question selection algorithm.

Activity Data Project

Python 3, Keras — *Oct 2018 - Nov 2018*

Collected personal data on activities performed throughout the day for 9 months along with start/end times, and grouped tasks into 30 categories. Analyzed most productive hours of the day and built 2-layer LSTM predictive model.
