

EMPLOYMENT

LexisNexis Legal & Professional <i>Senior Data Scientist II</i>	Raleigh, NC <i>Oct 2026 - Present</i>
Benchmarked 15 open-source structured decision models (System One) against four LLM baselines across six classification tasks; fine-tuned three Pareto-optimal models (best-model held-out macro-F1: 92.7%) to improve latency (M4 Pro, median: 177 ms, p95: 254 ms).	
<i>Senior Data Scientist I</i>	<i>May 2024 - Oct 2026</i>
- Technical lead for an agentic legal drafting system; led its migration from RAG and continue to own development. - Reduced customer-facing product runtime by 24.8% through LLM call profiling and parallelization. - Profiled high pod memory usage and introduced lazy module loading, reducing time at peak memory from 86.4% to 68% of runtime. - On a 3-person team, increased the share of drafts rated suitable for users by attorney reviewers from 40% to 86% for complaints and 59.2% to 76% for motions. - Built a contrastive-learning filter to remove unrelated legal passages from search results; median filtering latency of 12ms across 40 queries. - Mentored an intern on a large-scale, full factorial experiment investigating Pareto-optimal configurations for draft quality and latency. - Built team developer tooling: a Rust MITM proxy with request replay, a web UI for visualizing intermediate agent steps, and custom Python lint rules beyond <code>ruff</code>'s rule set. Technology: Python, Litestar, Google ADK, React, Rust, TypeScript, Tailwind	
North Carolina State University <i>PhD Student</i>	Raleigh, NC <i>Aug 2019 - Jul 2024</i>
Hyper-parameter optimization: Proposed an optimizer that outperformed prior methods and ran 36.4% faster than Hyperopt on datasets used in the NeurIPS 2020 BBO Challenge. Defect prediction: Proposed GHOST, an adaptive oversampling and hyper-parameter tuning pipeline that outperformed prior deep-learning methods on 14 of 20 defect-prediction datasets. Semi-supervised learning: Developed GHOST2 for identifying actionable static-analysis warnings; achieved median AUC of 0.92 across eight open-source Java projects using 10% of the training labels. Teaching: TA for 830 students over 5 semesters across CSC 230 (C and Software Tools), CSC 510 (Software Engineering), and CSC 591/791 (Automated Software Engineering)	

RELEVANT PROJECTS

pi-permission-system (maintained fork) <i>TypeScript, Node.js</i>	May 2026 - Present GitHub
Maintain a permission-system fork for the Pi coding agent. Redesigned shell permissions using grammar-based analysis of pipelines, substitutions, and redirections, with protected-path checks and argument-aware approval rules. Extended enforcement to background commands and fixed concurrent subagent approval handling.	
Q&A System for Zotero <i>Rust, SQLite, LanceDB</i>	Oct 2024 - Present GitHub :: crates.io
Built an academic question-answering and semantic search system over a user's Zotero library. Wrote a custom PDF parser for academic papers (median throughput $\approx$ 2,400 pages/s across 11 PDFs; M4 Pro) and a RAG library with support for multiple providers and tool calling.	
RAISE <i>Python, Keras</i>	Aug 2020 - Jun 2026 GitHub :: PyPI
Sole developer of an ML utilities Python package used by multiple research groups for reproducible experiments. Downloaded 79k+ times on PyPI.	

SKILLS

Languages: Rust, Python, TypeScript, Java, C++, Gleam
ML/AI: Keras, PyTorch, Hyper-parameter optimization, RAG, LLM evaluation, Agentic systems, Google ADK
Frameworks: React, Flask, Litestar, FastAPI
Databases: LanceDB, MySQL, MongoDB, DynamoDB
Cloud: Google Cloud (Compute Engine, Cloud Storage, Vertex AI), AWS (EC2, S3, DynamoDB)

EDUCATION

North Carolina State University

Ph.D. Computer Science

Raleigh, NC

Aug 2019 - Jul 2024

- Advisor: Dr. Tim Menzies

- Dissertation: [Guidelines for the Application of Neural Technologies in Software Analytics \(or: How to Do More with Less in SE\)](#)

PES University

B.E. Computer Science – Advisor: Dr. Snehanshu Saha

Bangalore, India

Aug 2015 - May 2019

HONORS

Distinguished Reviewer, ICSE 2026

Mar 2026

Google Developer Expert - ML and GCP

Mar 2025 - Present

Google Cloud Champion Innovator - Cloud AI/ML

Oct 2022 - Mar 2025

Google Cloud Research Innovator

Feb 2022
