Education

North Carolina State University — Raleigh, NC

Ph.D. Computer Science — *Aug 2019 - Jul 2024*

- Advisor: *Dr. Tim Menzies*
- Dissertation: *Guidelines for the Application of Neural Technologies in Software Analytics (or: How to Do More with Less in SE)*

PES University — Bangalore, India

B.E. Computer Science – Advisor: Dr. Snehanshu Saha — *Aug 2015 - May 2019*

Employment

LexisNexis Legal & Professional — Raleigh, NC

Senior Data Scientist II — *Oct 2026 - Present*

- Fine-tuned small structured-decision models to match LLM-baseline performance (macro-F1 92.7%) at 177 ms median latency on-device, after benchmarking 15 models across 6 tasks.

Senior Data Scientist I — *May 2024 - Oct 2026*

- Technical lead for an agentic legal drafting system; led its migration from a RAG pipeline and own its ongoing development.
- On a 3-person team, increased the share of drafts rated suitable for users by attorney reviewers from 40% to 86% for complaints and 59.2% to 76% for motions.
- Reduced customer-facing product runtime by 24.8% through LLM call profiling and parallelization.
- Built a contrastive-learning filter using InfoNCE with alignment and uniformity losses to remove unrelated legal passages from search results; median filtering latency of 12 ms across 40 queries.
- Built team developer tooling: custom Python lint rules beyond `ruff`'s set, enforced in CI; a Rust MITM proxy with request replay that teammates use to debug without waiting on upstream responses; and a web UI for visualizing intermediate agent steps.
- Mentored an intern on a large-scale, full factorial experiment investigating Pareto-optimal configurations for draft quality and latency.
- Profiled high pod memory usage and introduced lazy module loading, reducing time at peak memory from 86.4% to 68% of runtime.
- **Technology:** Python, Litestar, Google ADK, React, Rust, TypeScript, Tailwind

North Carolina State University — Raleigh, NC

PhD Student — *Aug 2019 - Jul 2024*

- **State-of-the-art hyper-parameter optimization:** Derived loss-curvature estimates for smoothness- and flatness-guided search; the smoothness-based method matched or beat prior SOTA on 17 of 19 software datasets.
- **Better, faster deep learning for SE:** Introduced fuzzy oversampling and optimized neural-network hyper-parameters, surpassing prior SOTA with median relative gains of 15% in defect-prediction F1 and 12% in AUC across four code smells. Built tuned feedforward models that matched or beat SOTA across 15 issue-lifetime benchmarks in minutes instead of hours.
- **Microservice partitioning:** Developed a graph neural network partitioner with a custom weighted loss; reduced the share of cross-service calls by a median 66% versus prior SOTA across four applications.
- **Semi-supervised learning:** Combined oversampling, nearest-neighbor labeling, and hyper-parameter optimization for state-of-the-art static-analysis warning triage: median AUC 0.92 on eight Java projects using 10% of training labels.
- **Teaching:** TA for 830 students over five semesters in C programming and software engineering.

Funding

$5,000, Google Cloud Academic Research Grant, Feb 2022

Service to Profession

Contributing Member, Python Software Foundation (Mar 2021 - Present)

Guest Editor, IEEE Software SI: The Impact of AI on Productivity and Code 2025; ASEj SI: Replications and Negative Results (RENE) 2025; EMSE SI: Replications and Negative Results (RENE) 2025

Workshop Co-Chair, Intelligent Software Engineering (ASE '25, ICST '26); Replications and Negative Results (ASE '24)

PC Member, AAAI 2025-2027; FSE 2026-2027; ICSE 2026-2027; EDM 2026; ASE Industry Track 2026; AI Foundation Models and Software Engineering (FORGE) 2024; ICSME Artifact Evaluation Track, 2021-2023; ASE Artifact Evaluation Track, 2022; International Conference on Modeling, Machine Learning, and Astronomy (MMLA), 2019

Reviewer, TOSEM 2026; TSE 2025-2026; NeurIPS 2023, 2025; EMSE 2021, 2025; ASEj 2025; ICML 2024-2025; ICLR 2024-2025; NCAA 2023-2025; TMLR 2024; Neural Processing Letters 2023-2024; Artificial Intelligence Review 2023; J. Big Data, 2023; ASE 2023; IEEE SSCI 2020

Honors

Distinguished Reviewer, ICSE 2026 Mar 2026

Google Developer Expert - ML and GCP Mar 2025 - Present

A global network of experts recognized by Google for deep technical expertise, community leadership, and mentorship.

Google Cloud Champion Innovator - Cloud AI/ML Oct 2022 - Mar 2025

A Googler-nominated global network of 500+ technical experts in Google Cloud; merged into the Google Developer Experts program in 2025.

Google Cloud Research Innovator Feb 2022

Research Innovators are a global community of researchers driving scientific breakthroughs with Google Cloud.

Invited Talks

Feb 2024, "*Improving deep learning performance using theoretical ML*" at BITS Pilani, KK Birla Goa Campus, India

Skills

Languages: Rust, Python, TypeScript, Java, C++, Gleam

ML/AI: PyTorch, Keras, Hyper-parameter optimization, RAG, LLM evaluation, Agentic systems, Google ADK

Frameworks: React, FastAPI, Litestar, FastAPI

Databases: LanceDB, SQL, MongoDB, DynamoDB

Cloud: Google Cloud (Compute Engine, Cloud Storage, Vertex AI), AWS (EC2, S3, DynamoDB)
