

EMPLOYMENT

LexisNexis Legal & Professional

Senior Data Scientist II

Raleigh, NC

Oct 2026 - Present

- Benchmarked 15 open-source structured decision models (System One) against four LLM baselines across six classification tasks; fine-tuned three Pareto-optimal models (best-model held-out macro-F1: 92.7%) to improve latency (M4 Pro, median: 177 ms, p95: 254 ms).

Senior Data Scientist I

May 2024 - Oct 2026

- Technical lead for an agentic legal drafting system; led its migration from RAG and continue to own development.
- On a 3-person team, increased the share of drafts rated suitable for users by attorney reviewers from 40% to 86% for complaints and 59.2% to 76% for motions.
- Reduced customer-facing product runtime by 24.8% through LLM call profiling and parallelization.
- Built a contrastive-learning filter using InfoNCE with alignment and uniformity losses to remove unrelated legal passages from search results; median filtering latency of 12 ms across 40 queries.
- Built team developer tooling: a Rust MITM proxy with request replay, a web UI for visualizing intermediate agent steps, and custom Python lint rules beyond `ruff`'s rule set.
- Mentored an intern on a large-scale, full factorial experiment investigating Pareto-optimal configurations for draft quality and latency.
- Profiled high pod memory usage and introduced lazy module loading, reducing time at peak memory from 86.4% to 68% of runtime.
- Technology:** Python, Litestar, Google ADK, React, Rust, TypeScript, Tailwind

Amazon

Software Dev Engineer Intern

New York, NY / Bellevue, WA

May 2023 - Aug 2023

- Implemented and shipped profile locks for Prime Video on Echo Show devices.
- Technology:** React Native, TypeScript

Software Dev Engineer Intern

May 2022 - Jul 2022

- Developed a full-stack system to publish announcements in scorecards used by delivery service partners.
- Technology:** React/Redux, TypeScript, Redux Saga, DynamoDB, Java Spring

RELEVANT PROJECTS

pi-permission-system (maintained fork)

TypeScript, Node.js

May 2026 - Present

[GitHub](#)

Maintain a permission-system fork for the Pi coding agent. Redesigned shell permissions using grammar-based analysis of pipelines, substitutions, and redirections, with protected-path checks and argument-aware approval rules. Extended enforcement to background commands and fixed concurrent subagent approval handling.

Q&A System for Zotero

Rust, SQLite, LanceDB

Oct 2024 - Present

[GitHub](#) :: [crates.io](#)

Built an academic question-answering and semantic search system over a Zotero library. Developed a Rust RAG library with configurable LLM, embedding, and reranking providers, tool calling, and limits on concurrent embedding requests. Wrote a custom PDF parser for academic papers (median throughput $\approx$ 2,400 pages/s across 11 PDFs; M4 Pro).

JournalBear

TypeScript, React, Zustand, Electron, SwiftUI

Jan 2017 - Jul 2026

[GitHub](#) :: [App Store](#) :: [Softpedia](#)

Built and shipped a journaling app with AES-256 encryption, an Electron/React desktop client, and native SwiftUI apps for iOS and macOS.

The 1 Billion Row Challenge (1BRC)

Zig

Feb 2026 - Apr 2026

[GitHub](#)

Wrote a Zig implementation for the 1BRC, running in 1.20s (M4 Pro, 14 core) using mmap, open addressing (Wyhash + Robin Hood probing), and packed SIMD.

Programmable Resumes

Python

Aug 2023 - Mar 2025

[GitHub](#)

Developed a resume specification language and Python compiler that generates PDFs from structured resume data via LaTeX. Supports tag-based role filtering, two LaTeX templates, and parallel builds. Wrote this resume using this tool.

SKILLS

Languages: Rust, Python, TypeScript, Java, C++, Gleam
ML/AI: Keras, PyTorch, Hyper-parameter optimization, RAG, LLM evaluation, Agentic systems, Google ADK
Frameworks: React, Flask, Litestar, FastAPI
Databases: LanceDB, MySQL, MongoDB, DynamoDB
Cloud: Google Cloud (Compute Engine, Cloud Storage, Vertex AI), AWS (EC2, S3, DynamoDB)

EDUCATION

North Carolina State University <i>Ph.D. Computer Science</i> ◦ Advisor: <i>Dr. Tim Menzies</i> ◦ Dissertation: <i>Guidelines for the Application of Neural Technologies in Software Analytics (or: How to Do More with Less in SE)</i>	Raleigh, NC <i>Aug 2019 - Jul 2024</i>
PES University <i>B.E. Computer Science – Advisor: Dr. Snehanshu Saha</i>	Bangalore, India <i>Aug 2015 - May 2019</i>

HONORS

Distinguished Reviewer, ICSE 2026	Mar 2026
Google Developer Expert - ML and GCP	Mar 2025 - Present
Google Cloud Champion Innovator - Cloud AI/ML	Oct 2022 - Mar 2025
Google Cloud Research Innovator	Feb 2022
